### **DETAILED ACTION**

Claims 15 – 18 have been presented for examination. Claims 15 and 18 have been amended in an amendment filed 3/25/2005.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/25/2005 has been entered.

#### ***Terminal Disclaimer***

The terminal disclaimer filed on 3/25/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration dates of 6580683 has been reviewed and is accepted. The terminal disclaimer has been recorded.

#### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

Art Unit: 2131

by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan W. Hallman (Reg. No. 42,644) on 5/5/2005.

This application has been amended as follows:

**IN THE CLAIMS**

Cancel claim 16 without prejudice.

Replace claim 15 and 18 as follows.

Claim 15: An access method for an optical disk including a single continuous information layer having a first region containing parallel-written mastered content and a second region which is user writable, the method comprising:

recording license information in the second region of the single continuous information layer;

comparing the license information to license criteria; and

permitting access to at least a portion of the mastered content responsive to the comparison of the license information to license criteria.

Claim 18: An access method for an optical disk including a single continuous information layer comprises a phase change layer.

***Drawings***

Examiner acknowledges drawing submitted on 11/21/2000. The submitted drawings have been entered and made of record. The drawings filed on 11/21/2000 are objected, and subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948.

***Allowable Subject Matter***

1. Claims 15, 17 and 18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Art) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations, as recited in independent claim 15 and subsequent dependent claims.

The CPA does not teach or suggest a system or apparatus for providing an optical disk including a single continuous information layer having a first region containing parallel-written mastered content and a second region which is user writable; and recording license information in the second region of the single continuous information layer; comparing the license information to license criteria; and permitting access to at least a portion of the mastered content responsive to the comparison of the license information to license criteria.
